"Your Telecommunications Lifeguard"

Who are we?

Shanon Communications, Inc is a telecommunications company that services start-up to medium size businesses requiring voice and data solutions. The company was established in 2005 by CEO Stephanie Person as an S corporation in accordance with statutes in the state of Florida. We are certified as an DM/DWBE, SBE by the Hillsborough County Economic Department, and a Disadvantage Business by the state of Florida. Our headquarters is located in Tampa Florida servicing clients throughout the United States.

What we do.

We install and perform

Strategic programming on phone systems manufactured by: Nortel Networks, Avaya, Samsung, and NEC Communications. Systems installed are legacy, or VOIP.

Design and install

Your network cable distribution using CAT5, CAT6, and fiber optic cable. Cable distribution is installed by BICSI Registered Communications Distribution Designers (RCDD).

Consulting Services

Consult on the customer's behalf concerning design, and specifications of their voice and data networks in accordance with the services we offer.

Project Management

Represent the customer to oversee their project progress to completion. Assure all installations meet the customer's expectation, and all statutes of their state and governing associations have been met.

Email: shanoncom@shanoncommunications.com

Service providers

Shanon Communications has aligned with service providers that can deliver services from: Verizon, PATEC, Nuvox and others. Service providers can deliver: T1, PRI SIP trunking, and internet services to accommodate our customers servicing need.

Who have we serviced?

Historically, we have provided voice, data, and cabling solutions to these business types: community colleges, legal firms, military consultants, and industrial business facilities to name a few. Our telecommunications solutions utilize Nortel Networks Norstar, Nortel BCM 50, Avaya partner, Samsung, and NEC legacy, or VOIP phone systems. The Nortel Norstar Call Pilot 100/150, is the stand alone voice mail to accommodate the Nortel Norstar phone system. CAT5, CAT6 and fiber optic network cable design is an additional strength that strongly supports our voice and data solutions installed by our Registered Communications Distributor Designers (RCDD).
